WORK EXPERIENCE

Python Developer Yudiz Solutions Pvt. Ltd.

01/2021 - Present

Ahmedabad

Projects

- **Placement Test:** Automate the technical round of the campus hiring process where recruiters can conduct MCQ-based technical tests.
- **Property Scrapper:** Automation and scraping project in which we had automated the number of property websites.
- **Rent Space-IZ:** Real estate application. I migrate code from PHP to Flask.
- **Fix Space-IZ:** Fix provides a platform that allows skilled professionals to connect with users looking for specific services. I fixed and optimized old flask code.
- **Ride Space-IZ:** Ride is an app to book cabs. App available in both iOS and android. I create high performance APIs using Django REST framework. Design algorithm to find nearest driver.
